# ABOUT HOME & WILD

My journey with natural skincare products started when I purchased a deodorant free of aluminium, phthalates and parabens. Having noticed the positive change in my health, I started digging further into the ingredients used in everyday skincare products, and the effect it has on our health; of particular interest to me was the effect that it could have on our hormones.

The porous nature of skin means that products can penetrate through the superficial layer of the skin, therefore the products you choose to put on your skin can affect your health and sense of wellbeing - not only your skin.

Making my own natural skincare products allowed me to handpick each ingredient so that it would be of benefit to my body and mind. These are benefits which I hope to share with each and everyone who chooses to use a Home & Wild product.

With nature's best wishes,  
Wendy Ackermann
